USER NOTICE

PRO-TECH 8 TITAN MODEL STRUCTURAL FIREFIGHTING GLOVE Models # PT-8TNSC and PT-8TNLC

JANUARY, 2009

Dear Pro-Tech 8 TITAN glove user and distributor,

TECHTRADE LLC is voluntarily issuing this notice to the firefighting and emergency response community as an alert to the possible existence of non-compliant sewing thread in an area confined to the seams along the glove inner liner.

This notice pertains only to **LOT #'S 4-08, 5-08, 6-08, 86A, and 86B** manufactured between April and July 2008 . The lot numbers appear on the glove label.

The proper compliant thread is a bright yellow color. The non-compliant thread would be a white color. You can verify the correct thread color by slightly spreading apart the 1 1/2" long seam that connects the two ends of the leather welt which wraps around the inside of the cuff edge.

If you discover incorrect thread please contact to TECHTRADE immediately as indicated below to arrange appropriate follow up.

We emphasize that there has not been any incident report, report of concern, any complaint or any other report from actual use in the field with regard to this thread. However, TECHTRADE believes it is necessary to inform our customers in this case to insure the continuing integrity of our product and our commitment to firefighter safety.
